About us

1. Who we are

We are a structure working in digitalization with references in Cameroon and Germany. Created in July 2022, we offer our Services in several areas, notably by developing applications for the production and automotive industries, in Medicine and mainly in IT. Our primary objective is to facilitate the digitalization of businesses and also individuals and also make the job market more accessible in the country and region. We also offer our services internationally and work on projects mainly remotely from our different offices. In order to reduce the unemployment rate and encourage Cameroonian youth to self-employment we work tirelessly to create a bridge of technology and know-how between the African and European continent to make the job market and especially the workforce more attractive. In a cooperation where all parties are winners we look forward to working with you and advancing Technology.
